

AEOLIAN-SKINNER ORGAN COMPANY
Opus 1110, 1951, 1968*

The main portion of the organ, located behind the facade on the Gospel side of the chancel, was built in 1951 by the Aeolian-Skinner Organ Company of Boston. It was designed by and installed under the supervision of G. Donald Harrison, president and tonal director of the company until his death in 1956. In 1968, Aeolian-Skinner made additions (denoted by asterisks * below): the Antiphonal division flanking the Patriot's window on the west wall, the Positiv division on the Epistle side of the chancel, several new ranks in the main organ, and a new four manual console. Emery Brothers of Quakertown, PA, have been caretakers of the organ since 1985.
